

Forum Oilfield Technologies

Because Forum is a new name in drilling and production products, we get asked, "Who is Forum and what is your mission?" Let us explain.

Forum was founded when several different oilfield product companies came together with the experience, know-how and desire to do a better job providing innovative mission critical solutions that improve your rig.

Forum is known worldwide for the following rig support equipment:

- Bearings
- Centrifugal Pumps
- Automated Torque Tools
- Tubular Handling Tools
- Mud Gate Valves
- Manifolds
- Hydraulic Cat Walks
- Drilling Instrumentation
- Mud Pump Spares

In addition to the mentioned products, our office has experienced sales personnel to help with your equipment needs for the following products:

- Hydraulic Catwalks
- Hydraulic Torque Tools
- Powered Mousehole Tools
- Manifolds - Choke & Kill, Standpipe, Cement, etc.
- Driller's Consoles
- Drilling Data Reporting Systems
- Wireline & Coiled Tubing BOP
- Offline Activity Cranes
- General Purpose Cranes
- Gardner Denver® Mud Pumps

Our objective is to develop superior relationships with our drilling, workover and well intervention customers. Our promise is to work hard to build those relationships through regional support for all your Forum needs.

We look forward to discussing how we can improve your rig operations. To start please contact us below at the most convenient time for you.
